Profile

Full-stack developer with experience in Vue 2/3, TypeScript, and .NET. I enjoy working at the intersection of frontend and backend and focus on building stable, user-friendly solutions. Structured, curious, and clear in communication across teams.

Employment History

Fullstack - Det Faglige Hus, Esbjerg

Marts 2021 - Oktober 2024

- Built Vue 3 + TypeScript solutions, including an internal system from scratch.
- Developed .NET backend features with RabbitMQ, webhooks, and improved logging.
- Created Hangfire automations for daily workflows across several teams.
- Worked on the membership onboarding platform (frontend → backend & database).
- Designed a full-stack SMS solution with templates, logging, status handling, and archiving.
- Primary responsible developer on tasks coming through the service portal (bug fixing, data checks, minor feature work).

Key Results

- Created solutions used daily by 1,000+ users and supporting an organization of 253,000+ members.
- Created Automated workflows reduced manual handling.
- Improved reliability through better logging and integrations.

Education & Courses

Computer Science - Erhvervsakademi Sydvest, Esbjerg

August 2016 - January 2019

Bachelor in software development - Erhvervsakademi Sydvest, Esbjerg
